Print length : 132 pages

In the face of rising energy costs and climate change, it is more important than ever to design buildings that are energy-efficient and comfortable in hot climates. Design Primer for Hot Climates is an essential guide for architects and designers working in these challenging conditions.

This comprehensive book provides detailed guidelines on how to create energy-efficient buildings that are comfortable and sustainable. It covers all aspects of hot climate design, from the building envelope to the mechanical systems.

Design Primer for Hot Climates is a must-have resource for anyone working in hot, dry climates. It is a valuable tool for architects, engineers, designers, and students alike.

## Table of Contents

- 
- The Building Envelope
- Thermal Comfort
- Passive Cooling Techniques

- Mechanical Systems
- Case Studies

## **Praise for Design Primer for Hot Climates**

"Design Primer for Hot Climates is a comprehensive and well-written guide to energy-efficient architecture in hot climates. It is a must-have resource for anyone working in this field."

**- Dr. Sarah Wigginton, Associate Professor of Architecture, University of California, Berkeley**

"Design Primer for Hot Climates is an invaluable resource for architects and designers working in hot climates. It provides clear and concise guidance on how to create energy-efficient and comfortable buildings."

**- Michael W. Maynard, AIA, LEED AP, Principal, Michael W. Maynard Architects**
