If so, then you're not alone. Millions of people around the world are feeling the same way. We've been taught that the key to happiness and success is to control our lives. We've been told to set goals, make plans, and work hard to achieve them. But what if that's not the best way to live?

In his groundbreaking book, *From Control to Design*, author and life coach Peter Sage challenges the conventional wisdom that we must control our lives in order to be happy and successful. Instead, he argues that we must learn to design our lives, and that by doing so, we can create a more meaningful and fulfilling existence.

Sage's approach to life design is based on the idea that we are all creative beings with the power to create the lives we want. He believes that we don't need to control our lives; we need to design them.

When we design our lives, we take control of our own destiny. We decide what we want to create, and we take the necessary steps to make it happen. We don't let our circumstances or other people dictate our lives. We create the life we want, on our own terms.

From Control to Design is a practical guide to creating a more meaningful and fulfilling life. Sage provides readers with a step-by-step process for designing their lives, including:

- Identifying your values and goals
- Creating a vision for your life
- Developing a plan to achieve your goals
- Overcoming obstacles and challenges
- Living a life that is true to yourself

If you're ready to take control of your life and create a more meaningful and fulfilling existence, then From Control to Design is the book for you.
