A History of Espionage and Alcohol

Alcohol has been used in espionage for centuries. In fact, some of the earliest recorded instances of espionage involve the use of alcohol.

In ancient Greece, for example, spies would often use wine to loosen the tongues of their targets. And in the Middle Ages, spies would use alcohol to bribe guards and gain access to restricted areas.

During the Cold War, alcohol played a particularly important role in espionage. Spies from both sides would use alcohol to build relationships with their targets and to gather information.

One of the most famous examples of this is the case of Aldrich Ames, a CIA agent who was recruited by the KGB. Ames was a heavy drinker, and his KGB handlers would often use alcohol to get him to talk.

Ames eventually betrayed his country and sold secrets to the Russians. His case is a reminder of the dangers of drinking too much alcohol, especially when you're in a sensitive position.
