To their surprise, the symbols turned out to be shapes! Henry was amazed. He had never seen anything like them before. Old Blue, being the wise and knowledgeable bear that he was, patiently explained each shape to Henry.

Starting with the simplest, they discovered the **circle**, a special shape with no corners or edges. Then they met the **square**, a shape with four equal sides that formed right angles. Next, they encountered the **triangle**, a shape with three sides and three corners.

As they continued their exploration, Old Blue introduced Henry to more complex shapes like the **rectangle**, a shape with four sides and opposite sides parallel, and the **oval**, a shape that looked like a stretched circle.

Each shape they found brought a new wonder to Henry. He realized that shapes were not just abstract concepts but essential elements of the world around him.

As they returned home, Old Blue and Henry couldn't stop talking about their adventure. Henry was filled with excitement as he shared his newfound knowledge with his friends.

And so, the tale of Old Blue Finds Shapes For Henry became a story that was passed down for generations, inspiring young children to discover the magic and wonder of shapes for themselves.
