

# South Korea and Late Industrialization: An Oxford Paperbacks Review

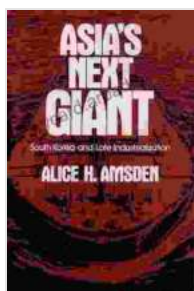

## Overview

South Korea's rapid industrialization in the late 20th century is a remarkable story of economic success. In just a few decades, the country transformed

itself from a predominantly agricultural economy to a global economic powerhouse. This book provides a comprehensive overview of South Korea's late industrialization, analyzing the factors that contributed to its success and the challenges it faced.

The book is divided into three parts. The first part provides a historical overview of South Korea's economy, from its early days as a colony of Japan to its emergence as an independent nation. The second part examines the key factors that contributed to South Korea's industrialization, including its government policies, its educational system, and its labor force. The third part discusses the challenges that South Korea faced in the wake of its industrialization, including environmental pollution, social inequality, and economic instability.

## Asia's Next Giant: South Korea and Late

**Industrialization (Oxford Paperbacks)** by Alice H. Amsden

## Key Findings

The book's key findings include:

- South Korea's industrialization was driven by a number of factors, including its government's interventionist policies, its well-educated labor force, and its access to foreign capital.
- South Korea's industrialization was not without its challenges, including environmental pollution, social inequality, and economic instability.
- South Korea's experience provides valuable lessons for other developing countries that are seeking to industrialize.

South Korea and Late Industrialization is a valuable resource for anyone interested in the economic development of South Korea. The book provides a comprehensive overview of the country's industrialization process, and it offers valuable insights into the factors that contributed to its success and the challenges it faced.

I highly recommend this book to anyone who is interested in economic development, industrialization, or South Korea.
